# Monroe Rubber & Plastic Material Order Reference Guide

When ordering scalloped strips specify the dimensions of the strips in the following sequence:

A = WIDTH OF STRIP (MATERIAL SHEET THICKNESS)
B = HEIGHT OF STRIP
C = LENGTH OF STRIP

Example: When ordering a scalloped strip with a 5/16" width, 5/8" height, and 9 5/8" length, specify as follows:

        A = 5/16" WIDTH OF STRIP (MATERIAL SHEET THICKNESS)
        B = 5/8" HEIGHT OF STRIP
        C = 9 5/8" LENGTH OF STRIP

In this example the scalloped strip is specified as follows: 5/16" x 5/8" x 9 5/8"
